

- Welcome to Minermex:

We're offering to buy & sell representation to acquire the best minerals from Mexico in China, Shanghai viocar imp. & exp. Co., Ltd, created the Minermex group in an effort to establish bilateral trade developments between China and Mexico, it established a sister company in Mexico, Laoying S.A. de C.V. to have a wider business scope in the business of importing and exporting various products to and from the American continent.

We believe that our three companies are not traditional trading companies, because they do not only trade with various products, but also provide a range of value-added services, such as commercial representations in the mining sector, business developments, and quality control.

- Brief history of Minermex:

Minermex is a leading mining company in Mexico with over 20 years of experience in the industry. Although Minermex was recently created, the team, in general, has at least 20 years of experience in business, specifically in the mining sector. with the goal of providing high-quality minerals to customers around the world.

- Our mission and values:

At Minermex, our mission is to provide our customers with the highest quality minerals while maintaining the highest standards of safety and environmental responsibility. We are committed to conducting our business with integrity, honesty, and transparency. We believe that by upholding these values, we can build long-lasting relationships with our customers and contribute to the sustainable development of the mining industry.

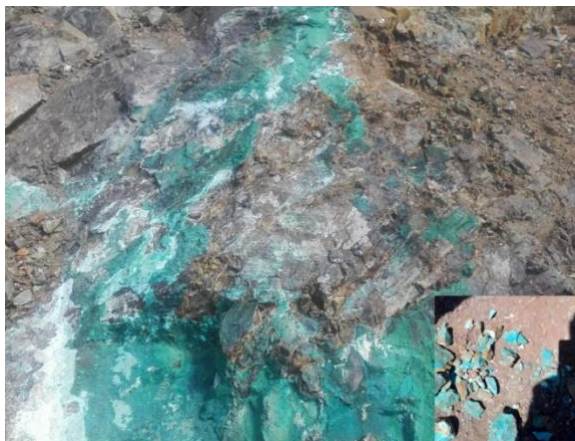

- Our commitment to quality:

At Minermex, we take quality seriously. We are committed to providing our customers with the highest quality minerals that meet or exceed their expectations. To ensure the quality of our products, we have implemented a rigorous quality control process that starts from the mining site and continues throughout the entire production process. . We use third parties such as SGS and equipment and technology to monitor and test the minerals, and we constantly strive to improve our processes to deliver the best possible and trustworthy minerals from Mexico.

#### Copper Mineral from Mexico:

Mexico is one of the leading producers of copper minerals in the world, with a rich history of mining and a favorable business environment for the industry. The country's copper mineral reserves are estimated to be the fourth largest in the world, with significant deposits located in various regions of the country.

We guarantee copper with a minimum grade of 10%, to 15%.

We have partnered with underground or open pit deposits.

We monitor the extraction, crushing, grinding, and analysis of the mineral, using internationally recognized certifiers, such as SGS, loading and export proces of the minerals.

Copper is a very important mineral in the world and a resource for which it is important for our company to create a safe atmosphere of trust for commercial transactions between China and Mexico.

Copper mineral from Mexico is known for its high quality and purity, as well as its competitive pricing. The country's mining industry has a strong focus on sustainability and responsible practices, ensuring that the environmental impact of mining is minimized. Additionally, Shanghai viocar imp.& exp. Co., Ltd is established in China to guarantee the security of each mineral transaction, building a relationship based in trust, with each possible buyer in China.

Compared to other sources of copper minerals such as Chile and Peru, Mexico offers a more diverse range of mineral deposits, including both oxide and sulfide ores. Additionally, Mexico's mining industry has a reputation for being more stable and less prone to labor disputes and other disruptions compared to other countries in the region.

China is the world's largest consumer of copper minerals, with a growing demand for high-quality copper ore. The country's copper consumption has increased significantly in recent years, driven by urbanization and infrastructure development.

China's copper mineral market is expected to continue growing in the coming years, with a focus on sustainable and responsible mining practices. The demand for the copper mineral is expected to increase in the energy, construction, and transportation sectors.
